Meeting Format	In Person

Roll Call	
Status	Attendee
 Present	David, Annabel, Nirav, Nathan, Brian, Jeremy
 Absent	-

Key Discussion Points

Point	Description
1	David delegated remaining sections of the Project Approach and Technology Stack Selection file.
2	Brian worked on the sections assigned in the Project Approach and Technology Stack Selection file.
3	Clarification Topics - The team compiled a list of topics requiring clarification by the TA.
4	GitHub Repository - The team cloned the latest version of the project's GitHub repository on individual machines.
5	GitHub Collaborators - Added the TA and Professor's GitHub accounts as collaborators to the repository.
6	TA Meeting - The team is assigned the weekly TA meeting at H847 from 6:25 PM to 6:45 PM.
7	Task Logging - The "Estimate" label will be used to log time spent on tasks quantitatively.
8	Meeting Minutes - Meeting minutes are already logged on the GitHub wiki from the first meeting.
9	Sprint Planning - Tasks for the next sprint will need to be listed in the Wiki page and GitHub Projects.

Point	Description
10	User Stories - User stories can be created based on our criteria, but must include sprint requirements.
11	Release Strategy - Sprints will be released through GitHub releases instead of folders.
12	Reference Frame - Time required for issue completion will determine story points for an issue. (1 hour = 1 story point)
13	Documentation Tasks - Re-delegation of tasks to write documentation for Sprint 1 user stories.
14	Hyperlinking - "Planning for Sprint 2" needs to be hyperlinked to the list of labeled issue items.
15	Database Schema Visualization - Brian and Nathan explained initial database schemas using PrismaLizer.
