

# SvelteState - Sprint 1 - Meeting 3 - Feb 7 2024

<b>Meeting Information</b>		<b>Roll Call</b>	
Meeting Date	07/02/2024	<b>Status</b>	<b>Attendee</b>
Meeting Time	10:15 AM - 10:45 AM (30 min)	 Present	David, Brian, Jeremy, Annabel, Nathan, Nirav
Meeting Format	In Person	 Absent	-

## Key Discussion Points

Point	Description
1	David requested the team members to explain the user stories they have written and to elaborate on the tasks they could.
2	Brian explained the user story he wrote regarding the operations that can be done on reservations through the scope of the website user.
3	Discuss with the TA if we have to redo a user story that we already worked on in advance, or completely remove it and re-write it for the next sprint.
4	David explained the user story he wrote regarding the operations that can be done by all three scopes (CSR, customer, and Sysadmin).
5	Jeremy explained the user story he wrote regarding the customer's ability to browse vehicles that should be available to rent.
6	Annabel and Nathan have not written their user stories yet, but have explained that they will have something minimal done by Friday for further TA clarification.
7	The team discussed how to link sub-issues to user stories on our GitHub repository. The approach is to convert checkbox items in a user story into GitHub issues, which can then be checked off.
8	It was decided that issue items will only be created from story items, not from issues themselves.

Point	Description
9	Team members are assigned the task, to be completed by Friday, of creating individual tasks for their respective user stories.
